

Cleaning made EZ

Domaille Engineering is proud to announce our new Air Cleanse cleaning wand kit. The innovative hand held cleaning wand has an integrated pressurized fluid and filter system for a debris free cleaning operation. Use the wand to clean polishing media from any surface including the polishing fixture, film or machine.

Manufactured to Domaille Engineering's exacting high quality standards

Benefits at a Glance:

- Can accurately spray air, fluid or a pressurized mist
- Special 2 μ m filtering system eliminates process variables associated with contaminated cleaning fluids
- Designed for integration into Domaille polishing machine
- Will remove polishing media from most surfaces
- Can be used to lubricate polishing film between process steps
- Lightweight, hand held device for ease of use
